

Lipero Story Quest Ch. 4 – Through the Forest

The forest is a dark and dangerous place. There are many traps set to keep trespassers away. The Pobri will help you, but they will only do so if you can prove yourself worthy of their knowledge and wisdom.

Task 1: You will use Map A here. You need to start where the arrow points into the maze and finish where the arrow points out of the maze. In order to move through the maze, you will need to recognize multiples of 3. You may only move North (up), South (down), East (right), or West (left), not diagonally. Every mistake means that you'll get trapped and will need to ask the Pobri to help you. This means answering their challenging questions, so don't mess up!

Task 2: You will use Map B here. It is similar to Task 1, but you can move through any numbers except those that are multiples of 5 or multiples of 7.

Task 3: You will use Map C here. This task is very challenging. In order to move through the map, you can only move through multiples of 4, but you may not move through any multiples of 4 that are also multiples of 6.

Task 4: You will use Map D here. This task involves moving only through fractions that are equivalent to $\frac{3}{7}$

Task 5: You are at a fork in the road. The Pobri tell you that you must choose either the road going North, the road going North-East, or the road going West. The Pobri hand you a small treasure chest, but it is locked. You will need to figure out the combination of the lock before you can open it. The combination for the lock can only be figured out if you can correctly answer the following problems. (Hint: Use BODMAS)

1) $3 + 2 \times 7 =$

2) $(15 + 6) \times 12 - 100 =$

3) $(4 \times (9 + 1) - 4) \div 6 =$

Task 6: You have unlocked the treasure chest! You receive a note with a poem on it. Look at the poem. If you can solve its riddle, then you will find out which direction will take you to the Parliament!

"The sun is like us, though it cycles each day. It also has dreams, but they soon fade away. If it is born at one end, then it dies at the other. Where does the compass point when the sun says good night mother?"

Congratulations! You've made it to the Parliament. Time to go inside...

Map A

3	6	16	22	12	15	42	24	12	8
8	15	13	14	3	28	31	25	6	29
